

Playback of Recorded Footage on the GeoVision System

The instructions below explain how to export and playback recorded video on a GeoVision Surveillance DVR using a USB thumb drive
 1. Insert a USB thumb drive into the USB drive of the GeoVision Surveillance DVR.
 Then on the main screen of the GV-System, click the button. Then select Video / Audio Log.

Selecting the Camera
 Click on the Camera drop down list
 Select the wanted camera

Select the Year / Month / Day

Select Time

Select Save as Avi

The Playback Toolbar

Select the folder you wish to save it to USB

Check mark **Save as Exe**
 This format allows you to auto-play the files with any third-party player.

Click OK
